Milliman **MedInsight**

Innovation Portal

Elevate your analytics with cutting-edge AI tools and expanded functionality

In today's data-driven healthcare landscape, organizations need more than just access to information—they need the tools to transform that information into actionable insight. Too often, data analysis is slowed by fragmented systems, manual processing, and limited collaboration across teams.

The Milliman MedInsight® Innovation Portal is a cloud-based solution purpose-built to overcome these challenges. It streamlines data preprocessing, provides immediate access to your organization's claims data, and delivers ready-to-use models in a fully managed, HITRUST-certified environment. Designed for both business users looking to expand their analytical capabilities and data scientists seeking a more powerful and collaborative platform, the Innovation Portal accelerates data workflows, deepens analytical insight, and improves how teams share and apply findings across the enterprise.

Key Benefits

Built on Databricks' data lake storage, the Innovation Portal empowers your organization to:

Gain Timely and Deeper Insights

Quickly uncover utilization and cost trends and other valuable insights with the power to execute large, complex SQL and Python queries.

Speed to Market

Accelerate deployment with expert-managed provisioning, security, user setup, and data operations—all handled by the trusted team at MedInsight.

Handle Big Data Sets

Efficiently build, deploy, and scale AI and ML models to manage growing volumes of data from diverse sources.

Focus on the Future

Move beyond traditional analysis by using your data to predict and shape future outcomes, rather than relying solely on historical insights.

Get to Value Faster

Utilize pre-built ML models to accelerate your processes and swiftly resolve data issues.

Reduce Resource Reliance

Achieve all of this without overburdening your IT team or relying heavily on external developers.
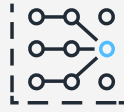

Key Features

AI Assistant

Harness advanced AI capabilities to drive deeper data exploration, uncover trends, and receive tailored recommendations aligned with your goals.

Custom Dataset Uploads

Securely import and integrate your own data for specialized analyses that support unique business objectives.

Access to MedInsight Enriched Claims Data

Tap into enhanced claims intelligence for better decision-making and strategic planning by running your data through leading groupers and analytics, complemented by Milliman's gold-standard actuarial benchmarks.

Access to Market Data

Leverage diverse public sources such as public use files, NAIC filings, and cost reports to perform robust market analyses and benchmark operational performance.

Integration with BI Tools

Easily connect your data to prominent BI platforms, enhancing your dashboards and reports with powerful, actionable insights.

Automation of Tasks

Boost efficiency by automating routine processes, freeing your team to focus on higher-level initiatives.

Use Cases: Unlocking Potential with the Innovation Portal

Empower Non-Technical Business Users

Democratize data analytics by making it accessible to everyone in your organization. With our intuitive solution, non-technical users can confidently access information, create queries in natural language, and make quick, informed decisions. Leave behind the complexities of traditional data navigation and embrace a more inclusive approach to insights, where everyone can contribute to smarter business outcomes.

Leverage Advanced Healthcare Data Analysis and AI Tools

Conduct advanced healthcare data analysis using flexible languages like R, Python, and SQL. Empower super-users to harness AI tools for deeper, expert-validated insights—moving beyond traditional platform constraints to deliver richer, more actionable results.
