# Milliman **MedInsight**

Healthcare Analytics and Insights

Confidence in every decision, backed by data you can trust

In today's healthcare environment, delivering affordable, high-quality care remains a central priority. To succeed over the long term, healthcare organizations need a clear understanding of their operations and reliable insights across the enterprise. With the right analytics in place, organizations can monitor cost and utilization trends, better understand patient populations, strengthen network performance, and support the transition to value-based care (VBC), supported by AI-enabled intelligence built on trusted, well-governed data.

At Milliman MedInsight®, we believe reliable data is essential to sound decision-making and meaningful improvement. That is why we bring together trusted data, proven technology, embedded AI, and deep industry expertise to help healthcare organizations generate insights they can rely on. Our solutions support more efficient operations, better patient outcomes, and informed decisions that lead to measurable progress.

300+ healthcare organizations served

10 top-rated U.S. health systems

Supporting care for 160+ million Americans

75+ years of Milliman data expertise

Advancing value-based care and total cost of care with AI-powered intelligence

See what your organization's data can support when it is built for healthcare. MedInsight provides a platform designed to meet the real needs of hospitals, healthcare systems, ACOs, and health plans. With trusted data, practical tools, and experienced healthcare professionals, organizations can make better decisions, use resources more effectively, and improve patient care.
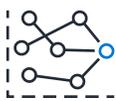

Dynamic cloud technology

Support timely analysis using a modern, cloud-based environment built on Databricks and Microsoft Azure, designed to manage healthcare data efficiently from ingestion through reporting and decision support.

Healthcare-focused platforms

Improve clinical and financial performance with flexible platforms designed for VBC, payer operations, risk adjustment, and the use of enriched data to support complex healthcare analyses.

Trusted enterprise data

Provide teams with consistent access to comprehensive and reliable data, such as claims, laboratory results, screenings, and provider information, so decisions are based on a shared and trusted source.

Gold-standard benchmarking

Apply Milliman-developed benchmarks to measure performance, evaluate variation, and guide improvement efforts that support informed strategy and high-quality care delivery.

AI-enabled intelligence

Apply AI and ML to accelerate analysis, improve reliability, and support complex modeling—grounded in trust, well-governed data and designed to keep human expertise in control of decisions.

Industry expertise and experience

Work with healthcare and actuarial experts who bring deep industry knowledge and practical experience to help organizations address complex challenges and plan for long-term success.

Who we serve

We serve health plans, ACOs, hospitals, and IDNs, supporting executive leaders, analysts, data scientists, and care managers with role-appropriate insights across the enterprise.

How MedInsight helps

Our comprehensive solutions help organizations:

- ✓ **Advance** VBC initiatives and **optimize** contract performance
- ✓ Build high-performing networks that **improve outcomes** and **financial performance**
- ✓ Improve patient outcomes and quality through **data-driven decision-making**
- ✓ **Identify inefficiencies** and key cost drivers across operations
- ✓ **Optimize** resource allocation and **reduce** unnecessary expenses
- ✓ **Enable collaboration** across teams and between payers and providers
- ✓ Support **high-quality care** through **governed clinical and claims data integration** for analytics and reporting

How we deliver measurable results

Our work focuses on achieving results that can be measured and sustained. We help healthcare organizations identify opportunities, apply data-driven strategies, and track progress over time. This approach supports practical improvements in performance, quality, and cost management.

$1.46 million
in ED visits and patient **readmissions**

40 hours
per month per analyst saved equal to approximately $250,000 per year in compensation

$658.4 million
shared savings in 2024 for customers participating under the CMS Medicare Shared Savings Program
