Milliman **MedInsight** Payer Insights

Transform complexity into clear opportunities

Extracting valuable insights from disparate data sources within a health plan can be a demanding task. The process is frequently slow, disjointed, and fraught with challenges, often leading to inefficiencies and missed opportunities. As the healthcare landscape becomes increasingly complex, achieving alignment across the entire organization has shifted from being a mere advantage to an absolute necessity. This alignment is essential for staying ahead of industry trends, making informed decisions, and driving smarter, more effective strategies.

The Milliman MedInsight[®] Payer Insights application provides health plans with an integrated enterprise framework that enhances speed to insight through intuitive dashboards and reports, enabling quick monitoring of cost drivers, quality of care, and utilization trends. It ensures access to comprehensive and reliable data for performance evaluation against industry standards and offers a seamless launchpad to Milliman MedInsight with purpose-built reports requiring minimal training.

Payer Insights capabilities include:

Single source of truth

Establish a centralized repository by providing reliable data and insights to your financial, clinical and operational stakeholders to enhance collaboration and informed decisionmaking across your organization.

High-quality data and benchmarks

Confidently compare your performance to tailored benchmarks that account for risk and demographic factors at the service category level to assess your standings accurately.

Complexity made simple

Streamline access to answers for common but complex questions through advanced reports that account for technical, clinical and data algorithm navigation intricacies behind the scenes.

Speed to insights

Accelerate your ability to monitor cost drivers, quality of care, and utilization and cost trends over time with intuitive dashboards and reporting views to enhance operational efficiency.

User-driven dynamic views

Cut deeper into critical insights by leveraging pre-built dynamic drills and filters that align with existing custom data dimensions.

Increased transparency and trust

Enable top-line leaders to confidently make informed decisions using the same information as analysts by ensuring consistency, accuracy, and user-friendly access to critical insights.

Optimize total cost of care

Enhance the quality and cost-effectiveness of care for your members by gaining deep insights into major cost drivers, outlier clinical populations, provider performance, achievable savings opportunities and evidence-based measure compliance across all lines of business.

Target initiatives to improve efficiency

Easily filter data by time periods, member demographics, provider networks, regions, or other criteria, and seamlessly integrate these insights into your existing workflows to save time and enhance operational efficiency.

Achieve enhanced insights with premium service

Accelerate access to advanced analytics that are beyond the reach of basic self-service query tools and empower information consumers to perform analyses that were once exclusive to data scientists with deep clinical expertise.

Use cases: How Payer Insights can help

Identify cost drivers

Pinpoint key cost drivers and uncover potential savings opportunities in areas like provider contracting, unnecessary utilization, and optimizing sites of service.

Critical population tracking

Use comparative analytics to plan for the needs of complex and non-complex populations, measure total cost of care (TCOC) for clinical cohorts, identify geographic differences in cost and utilization behaviors of key populations.

Provider network management

Compare risk adjusted total cost of care outcomes, stratify top and bottom performers, track attributed PCPs and facilities through target provider specific key performance indicators.

Benchmarks

Utilize benchmarks from emerging experiences to compare performance against industry trends and standards, identify areas for improvement, and make data-driven decisions.

Get Started Today

Discover how your organization can enhance efficiency, achieve savings, mitigate risks, improve member outcomes, and foster innovation. To learn more, contact us at **info@medinsight.com**.

Existing customers should contact their Milliman MedInsight account executive or Milliman consultant.
