

MedInsight VBC Platform

Extend your analytics capability to identify care delivery, savings, and financial risk reduction opportunities with the MedInsight Value-Based Care Platform.

No matter where you are in your journey to value-based care (VBC), you are taking on increased risk to provide quality care and control costs. To move the needle in value-based care, you need a reliable data engine to fuel meaningful insights for optimizing operational performance, accommodating different payment models, reducing financial risk, facilitating superior care delivery, enhancing patient access, and fostering care collaboration.

The MedInsight® VBC Platform is designed to support Accountable Care Organizations (ACOs) focusing on VBC by delivering the insights you need, when you need them. With MedInsight, your organization can benefit from these necessary capabilities to succeed at VBC:

Maximized Potential

Manage performance, meet contractual targets, empower population health teams, and navigate the analytics maturity spectrum with ease.

Rock-Solid Data Confidence

Leverage a reliable and accurate analytics solution that represents one source of truth across departments with quick refresh times and end-to-end data analysis, revolutionizing enterprise-level communication and collaboration.

Integrated EMR Data

Enhance VBC care strategies and goals by leveraging Epic™ and population health technologies at the point of care.

Dynamic Tools

Leverage pre-built reports, query tools, 60+ methodologies, prescriptive analytics, and interactive visualizations for advanced analytic reporting at all stakeholder levels.

Advanced Customization

Create and customize data visualizations, transition seamlessly between apps, and utilize a powerful open-source library for advanced graphing capabilities.

Unrivalled Support & Training

Receive unparalleled support with our top-ranked customer service team and access additional training, documentation, and certification for increased proficiency across your team.

Data-Driven Decision-Making Solutions for ACO Success

Financial Analysis

- Analyze risk contract terms
- Understand areas of reduced revenue due to converting services from FFS to risk financials
- Set budgets and targets for savings
- Monitor progress

Right-Size Utilization

- Convert financial budgets and savings targets to utilization rates and unit cost requirements
- Identify areas of excess utilization and cost
- Develop targeted interventions to drive savings

Manage Patients

- Stratify patients by prospective, concurrent, and rising risk for targeted outreach by care coordinators
- Identify and close quality and risk coding gaps
- Discover and eliminate low value care in your at-risk population(s)

Physician Engagement

- Measure and report physician partner performance
- Evaluate the broader network of physician partners and non-partners

Improve Care Coordination, Quality, and Costs

Foster greater care collaboration by providing insights into coding gaps to improve quality and risk management, and reach shared goals.

Optimize Efficiencies and Outcomes

Align clinical, business, and compensation models on one system. Strengthen provider buy-in and trust with proven analytics and insights that reflect the unique goals of your organization.

Increase Performance, Satisfaction, and Profitability

Identify more opportunities to redirect patients to appropriate, in-network care and optimize valuable resources with an enterprise solution designed to improve outcomes, risk adjustment, and revenue.

MedInsight VBC Platform Components

Guiding You Through Each Step on the Path to Value-Based Care

VBC Insights

Quickly surface quality of care improvements, savings opportunities, and ways to reduce financial risk – and visually communicate them to stakeholders through the MedInsight dynamic reporting interface.

VBC Analytics

Perform advanced, custom analysis on claims and clinical data that is aggregated across payers, enriched with analytic groupers and methodologies, and run through the MedInsight Data Confidence Model.

Bundles

Review cost and utilization from initial diagnosis to post-discharge across bundles or episodes of care. Compare physician performance and identify cost savings to effectively manage your at-risk bundles.

VBC Contracts

Track financial performance across contracts so you can analyze the likelihood of success by contract, set individual contract targets, and manage performance throughout the year.

Innovation Portal

Apply AI and ML models for rapid insights; access enriched claims, market, and custom data; automate analytics tasks; and empower all users with intuitive, collaborative tools.

Epic Collaboration

MedInsight analytics are available from Epic within the Epic Value-Based Performance Management module. Epic users can directly access industry standard methodologies from Milliman MedInsight.
