## Network Optimizer

Ensure compliance, enhance patient access, and build better networks

Maintaining a strong and compliant provider network is essential but not without challenges. Changing regulatory requirements, inaccurate provider data, and difficulties in monitoring and measuring network adequacy can all impact access to care and overall effectiveness. Addressing these issues is key to ensuring members have appropriate access to high-quality care while meeting compliance standards.

The Milliman Network Optimizer empowers healthcare organizations and regulators to build and manage high-performing networks with confidence. Leveraging Milliman's industry expertise and advanced analytics, the Milliman Network Optimizer supports strategic decision-making and helps drive improved outcomes for members by evaluating provider affiliations, network participation, and quality ratings.

### Key Benefits

#### Advanced network analysis

Access precise network analysis and critical insights powered by Milliman's proprietary analytics tools and industry-leading data.

#### Accurate provider data quality

Leverage the Milliman MedInsight Provider Registry for a comprehensive, clean, and detailed provider dataset, surpassing public sources.

#### Integrated actionable intelligence

Gain deeper context with insights into health system affiliations, provider centrality, quality metrics, and network affiliations, all consolidated into a single, actionable view.

#### Industry expertise

Collaborate with expert teams possessing extensive operational and strategic experience and knowledge across both payer and provider sectors.

## Ensure network accuracy and compliance

Maintain accurate and up-to-date provider network data by leveraging automated data validation and industry-leading reference assets. Proactively identify and address potential network gaps to ensure compliance with regulatory requirements.

## Enhance member care, access, and satisfaction

Ensure that members have access to high-quality providers by identifying and closing network gaps. By providing appropriate access to care, you can support member retention and foster growth within your organization.

## Increase network management efficiency

Optimize your network and evaluate expansion into new markets with network adequacy scenario analysis. By leveraging data-driven insights, you can strengthen operations and ensure you meet adequacy requirements for both existing and emerging markets.

# Use cases: How the Network Optimizer can help

## Health plans

Efficiently evaluate, manage, and report on both provider network adequacy and provider data accuracy across all lines of business.

## Health systems

Enable the organization to gain comprehensive visibility into its patient access, geographic reach, and network adequacy across all payers and service areas.

## Regulators

Implement robust network adequacy standards, monitor provider directory accuracy, and ensure ongoing compliance with health plan and regulatory requirements.
