

# Milliman MedInsight Certification and Learning Program

Modern healthcare success depends on the ability to transform data into actionable insight. The MedInsight Certification and Learning Program is designed to help healthcare professionals at every level of analytics experience strengthen their skills, expand their expertise, and drive greater impact.

## \*NEW: Deep Dives

Our newest educational offering puts deep subject matter expertise, case studies, publications and real-world examples into your hands via next-level eLearning courses that delve into technical underpinnings and explore complex real-world scenarios. Topics include:

- Benchmarking
- Cost modeling
- Population health
- Healthcare waste
- Care management

Whether you need help learning how to optimize your data analytics in support of more confident business decisions or to build deeper technical expertise, Milliman MedInsight (MedInsight) offers flexible learning options to meet your needs. Our programs cover essential skills such as reporting, trend analysis, opportunity identification, and population health analytics. Included in your MedInsight solution, we provide both foundational and advanced certification courses, designed to meet you where you are and support every stage of your learning journey.

## Core Knowledge Courses

Choose from on-demand digital primers, technical and advanced analytics certifications, how-to and training videos, and a range of courses covering Advanced Health Data Analytics, Population Health Analytics, value-based care, and more.

## Technical Certifications

Grow your knowledge of healthcare data sources with **technical certifications** using a curriculum focused on industry-leading approaches, including best practices and real-world examples.

These equip professionals with advanced knowledge in healthcare analytics, covering essential methodologies and tools for cost modeling, benchmarking, clinical quality measurement, population health management, and waste reduction.

## Advanced Analytic Certifications

Go deeper with **advanced analytic certifications** that show you how to maximize your analytic center of excellence in a six-module series covering analytic maturity, using data in business, driving performance with analytics, predictive analytics, data visualization and health care economics.

## Value-Based Care Insights Certification

Get more out of the MedInsight VBC Insight application with a **VBC curriculum** that includes everything you need to take advantage of scalable analytic processes for improving care quality, controlling costs and minimizing risks.

### Multiple Ways to Learn

From **demonstration videos** and **on-demand digital courses** to **discussion forums, instructor-led practical skills labs**, and **live classes, virtual or onsite**, that can be customized for your organization, Milliman MedInsight offers a wide range of subject matter in a variety of accessible formats.
